

LA GERMINATION

- 1 J'observe le schéma de l'intérieur de la graine, et j'écris la légende en face de chaque flèche :

The diagram shows a cross-section of a bean seed. It consists of two large, rounded cotyledons (seed leaves) and a central embryonic axis. The embryonic axis includes a small shoot at the top and a root at the bottom. Three orange arrows point to specific parts: one to the left cotyledon, one to the shoot, and one to the root. There are three sets of blue writing lines: two at the top and one at the bottom, each with an arrow pointing to a corresponding part of the seed. A pushpin is pinned to the top right corner of the worksheet, and the bottom right corner is folded over.

L'intérieur d'une graine de haricot

Je dessine et je note mes observations tous les deux jours sur les plantations que j'ai réalisées.
